- **Chemicals, supplies and services**
- **Repairs, renovations, replacement and installation services**

## **About Us**

Virginia Pool Services is not a large pool management company and we don't plan to get large! We are able to provide prompt service to our community pools because we only manage pools in Virginia, with easy access to major routes. We currently manage pools in Alexandria, Arlington, Caroline, Fairfax, Falls Church, Loudoun, Prince William, Spotsylvania, and Stafford Counties. Our primary office is located in Prince William County and we have a satellite office in Stafford County.

The owners are three women who want to make a difference in pool management operations. Our clients know Cathie Lowe and Diane Vermillion who are in the field talking to property managers, inspecting lifeguard and pool operations, and making sure everything is working in a safe and efficient manner. Libby Kochendorfer works in the office managing its operations but she does get in the field occasionally.

Virginia Pool Services and its owners firmly believe in providing a safe environment to the pools that we manage. Safety, our first priority, is achieved by hiring qualified lifeguards and maintaining your equipment. Our teams are committed to working with each community to make sure that we are providing the best pool management and services.

Please contact Virginia Pool Services at 571-248-4400 or email [vaps@comcast.net](mailto:vaps@comcast.net) to learn more about us or to develop a pool management proposal customized for your community pool needs and budget.
